

"Enhance Your Data Integrity and Streamline Business Operations with ThaiBMA Web Services"

What is ThaiBMA Web Services?

ThaiBMA Web Services set up a seamless automatic communication between two electronic devices over a web-based channel, providing the most cost-effective, top quality, and robust solution for bond data extraction and calculation.

Why ThaiBMA Web Services?

**Towards
a Fair
and
Efficient
Bond
Market**

- ❖ **No More Mundane/Repetitive/ Tedious Tasks:** ThaiBMA Web Services help you cut out the mundane, repetitive, and tedious work of having to manually extract the data from ThaiBMA's huge database.
- ❖ **No More Human Errors:** ThaiBMA Web Services resolve mistakes caused by human errors by extracting and pushing the data directly from our system to your system.
- ❖ **No More Time-Consuming:** ThaiBMA Web Services take all the time-consuming data extraction off your hands to help give you more time to spend on your analysis and day-to-day operations. The delivery schedules are fully customizable to meet your specific requirements.
- ❖ **No More Confusion:** ThaiBMA Bond Calculation Service is very user-friendly and easy to operate, complying with market conventions and using the same pricing formula & decimal rounding as those used in iBond and ThaiBMA websites.

With ThaiBMA Web Services, You Can Have It All:

- ❖ Bond Feature & Cash Flow
- ❖ Bond Intraday Trading
- ❖ Bond Calculation
- ❖ Service à la Carte: customized web services of your choice

The screenshot displays a web application interface for bond services. At the top, there are navigation tabs: Bond News, Auction & Issue, Outstanding Values, Financial Statement, and Embedded Option. Below these are sub-tabs: Feature, Issuer Profile, Rating, Cash Flow, Participants, and Pricing Data. The main content area shows a 'Cash flow' table for bond 'LB143A: TLOAN42/06/15Y'. The table has columns for Coupon Date, %I Date, Par, Coupon (%), Interest, Principal, and Total Payment. Below the table are icons for Bond Info, Yield Curve, Calculation, Price/Indices, Analysis, and Report. To the right, there are input fields for Symbol, Re-open (LB/BOT FRN), Settlement Date, Trade/Ref. Date, Trade/Ref. Time, Yield (%), Call/Put Date, No. Unit, and Price (%).
